EDUCATION

The University of Texas at Arlington

- Master of Science in Software Engineering, GPA: 3.66 **Fall 2023 - Spring 2025**
- Bachelor of Science in Computer Science **Fall 2019 - Spring 2023**

Udemy - Full Stack Web Development Bootcamp

- Web applications from scratch using HTML, CSS, Node, REACT, MongoDB **Fall 2023 - Spring 2024**

EMPLOYMENT

Technical Intern – eClinicalWorks **Summer 2024**

- Developed a reusable tool for preprocessing input text in Python using NLP libraries such as NLTK and spaCy. Specifically, implemented HTML tag removal, stop word elimination, lemmatization, and custom word filtering for use in text data analysis.
- Optimized the performance of an internal product called AI Tech Doc Tool, which summarizes technical documentation. Discovered combinations of parameters (top_p and temperature) that led to high accuracy of over 90% in 25 test cases.
- Conducted customer research for users of eCW University, which led to an improved understanding of client expectations, the product's positive impact, and how to increase adoption. Collaborated with Strategic Account Managers to connect with numerous clients and interviewed over 15 practices directly.

Teaching Assistant – University of Texas at Arlington **Fall 2024 – Spring 2025**

- Assisted students with coursework, provided one-on-one tutoring, and supported software installation to enhance their understanding of course materials.
- Collaborated with professors to align teaching support with course objectives and ensure consistent student guidance.

Student Assistant – University of Texas at Arlington **Fall 2023 - Spring 2024**

- Enhanced user experience by creating and improving 16 accessible web pages, guiding students to underutilized resources. Incorporated user feedback, boosting satisfaction by 30%.
- Collaborated with the Sitecore team to learn and implement undocumented components and how to customize them using HTML, CSS, and JavaScript.

PROJECTS

- RoboJenga – Created an OSHA-regulated environment for a Smart Robot Arm (MITSUBISHI RV8) and programmed it to build a 3D model composed of Jenga blocks.
- PassFind – A password-generating command-line application that suggests memorable or obfuscated strong passwords. It is customizable in terms of length and suggestions.
- Song Oracle – An Android Music App that recommends new music and artists by incorporating feedback with quick and intuitive gestures (swiping left and right).
- Compilex – A web-based code compiler with real-time compilation, designed for partial and color blindness, features a user-friendly interface, and allows users to create accounts for saving code.

SKILLS

- Experienced in Python, JavaScript, HTML5, CSS, C++, Java, SQL, React, Three.js and C.
- Tools: Git, VisualStudio Code, Android Studio, Blender, Firebase, Jupyter Notebook, and Figma.

AWARDS

- Grace Hopper Scholarship – awarded by the GHC Scholars Program **Fall 2021 - Spring 2022**
- HackUTA – 3rd place winner **Fall 2024**
